## MEDIA STATEMENT

### RAND WATER REPLACING PART OF ITS F2 PIPELINE

Rand Water is in the process of replacing approximately 1.5 kilometre of its F2 Pipeline that is located in the eastern part of Roodepoort.

With the replacement process now in its final stage, a 9-hour Shutdown is necessary to replace the old valves and pipework. Thereafter, the contractor will execute the appropriate pressure testing and the commissioning of the pipeline.

Water supply to the following customers in Roodepoort will be interrupted:

- Roodepoort Industrial
- Florida Ext
- Maraisburg

In order to minimise water disruption to consumers we have, after consultation with Johannesburg Water, made a decision to commence with the Shutdown from 20h00 on Tuesday, 29 September 2020 to 5h00 on Wednesday, 30 September 2020.
