

Mapleton Booster Station Fully Recovers

Rand Water is delighted to announce that the Mapleton Booster Pumping Station System has been fully restored following a recent power outage that occurred over the past weekend. Our technicians and engineers worked tirelessly to restore the system, and we are pleased to report that the system is now functioning at full capacity.

While the Mapleton has fully recovered, we are aware that some areas in the City of Tshwane are still experiencing challenges. We would like to assure the affected communities that our technicians and engineers are working hand in hand with their counterparts in the City to overcome these challenges as soon as possible.

Rand Water is committed to providing a reliable and uninterrupted water supply to our customers, and we will continue to work tirelessly to achieve this goal. We thank our customers for their patience and understanding during this time and assure them that we are doing everything we can to restore normal operations as quickly as possible.
