MEDIA STATEMENT

POWER RESTORATION EFFORTS AT MAPLETON BOOSTER PUMPING STATION SUCCESSFULLY COMPLETED

We are pleased to announce that the restoration of power at Rand Water's Mapleton Booster Station has been successfully completed. The re-energizing process commenced at 01:05 and by 02:30 the booster station had achieved full pumping capacity. This marks a significant milestone in our efforts to ensure that water supply is fully restored to the affected areas.

It is important to note that there will not be an immediate relief in the water supply system. The system will require a recovery period of up to one week to fully stabilize.

We extend our sincere gratitude to all our stakeholders, particularly the affected communities, for their patience and understanding during this difficult period.

As we move forward, we will closely monitor the situation and provide regular updates to the public on any further developments.
